Professional Summary

Final-year Computer Science undergraduate with hands-on experience building full-stack web applications using React.js, FastAPI, Java, and REST APIs. Skilled in designing secure authentication, responsive interfaces, and API-driven systems, with a strong foundation in Data Structures & Algorithms and Object-Oriented Programming. Seeking a Full-Stack Software Developer role to build scalable, reliable software.

Technical Skills

Languages: Java, Python, JavaScript, SQL, HTML5, CSS3

Frontend: React.js, JavaScript (ES6+), Tailwind CSS, Responsive UI Design

Backend: FastAPI, JDBC, RESTful API Design, JWT Authentication

Databases: MySQL, SQLite

Core CS: Data Structures & Algorithms, Object-Oriented Programming, MVC Architecture

Tools: Git, GitHub

Projects

Web Trust Analyzer – Real-Time Security Monitoring Dashboard

React.js, JavaScript, REST APIs | GitHub

- Developed a React.js frontend for a Web Application Firewall (WAF) platform, integrating REST APIs from a Go backend to display real-time security telemetry and threat activity.
- Built interactive dashboards to visualize security events, attack statistics, severity levels, and threat-type distributions, helping users quickly identify and analyze potential threats.
- Designed a responsive multi-view interface covering threat monitoring, OWASP compliance, and firewall configuration, with controls for rate limiting and IP whitelisting/blacklisting.
- Collaborated in a cross-functional team, owning frontend architecture and end-to-end API integration while coordinating with backend developers using Go and SQLite.

SummarAI – AI-Powered Full-Stack Text Summarization App

React, FastAPI, Python, SQLite | GitHub

- Built a full-stack AI text summarization application using React 19 and FastAPI, integrating DistilBART (sshleifer/distilbart-cnn-12-6) for abstractive text summarization.
- Implemented drag-and-drop file processing for PDF, DOCX, and TXT formats, with 4 summarization modes (Normal, Academic, Simple, Research) and 3 configurable output lengths.
- Developed JWT-based authentication with bcrypt password hashing and SQLite persistence for user accounts, summary history, search, and favorites.
- Integrated YAKE keyword extraction with click-to-highlight, key-point and important-sentence extraction, reading-time and compression-ratio metrics, and one-click PDF export.

Education

Vellore Institute of Technology – Bhopal, Madhya Pradesh

B.Tech in Computer Science, CGPA: 7.82/10.0

2023 – 2027

Certifications

- Google IT Support Certificate – Google Career Certificates (Jan 2026) | [Verify](#)
- The Bits and Bytes of Computer Networking – Google, Coursera (Dec 2025) | [Verify](#)
